# GIYA G1

SERIES 2

Wrapped within Giya's distinctive shell-like guise lies an exceptional level of engineering detail and acoustic design.

## GIYA G1

Inspired by nature, formed by sound

The GIYAs' very shape is defined by proven acoustic principles taken to their logical conclusions, untethered by conventional wisdom and common construction techniques. Every element of the design has been refined to pioneer innovation - from our patented hand-built drive units, to our advanced vacuum infused composite enclosure, to our relentless elimination of resonances and reflections.
