GIYA G3 SERIES 2

Enclosing a volume of just over one quarter of that of the G1, the G3 is the answer to those seeking a package which is easily accommodated into the more typical home environment.

GIYA G3 SERIES 2

RELATIVE VALUES

Retaining the motor structure and suspension profiles of the larger siblings, the G3 is capable of producing substantial bass energy despite its reduced volume. The top of the bass enclosure displays the now uniquely familiar curl of the tapered tube absorber to completely eliminate the top to bottom resonances and deliver sharp accurate bass.

Equipped with the same D26, D50 and C125s drivers as the larger Giya's for the high and mid frequencies, the bass is handled by a pair of C135 units, set in a reaction-cancelling mount.
